Add footage on timeline.

Add various pictures of some things related to the documentary onto the timeline to fill up the last post being played on a bugle.

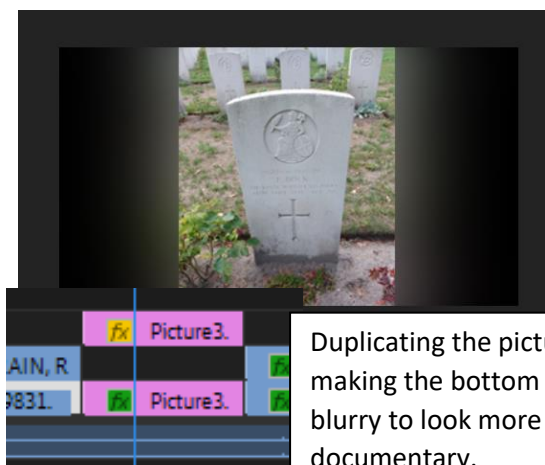

Add various songs and videos that I downloaded from YouTube onto the timeline.

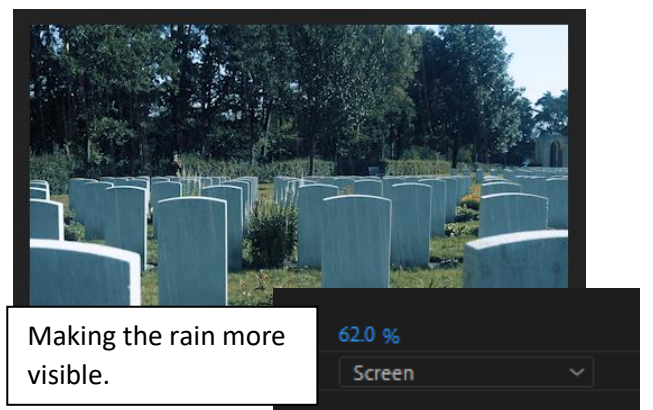

Overlaying rain to my prediction about when it rained based on my grandads' story.

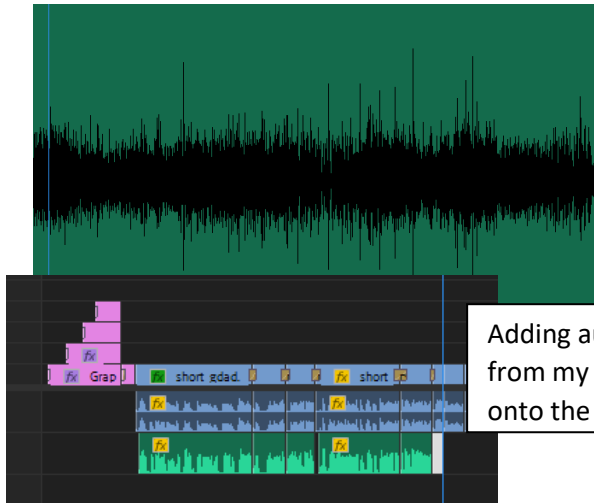

Collar grading the same shot light then dark, to show the sudden rain when my Gdad was about to play the bugle.

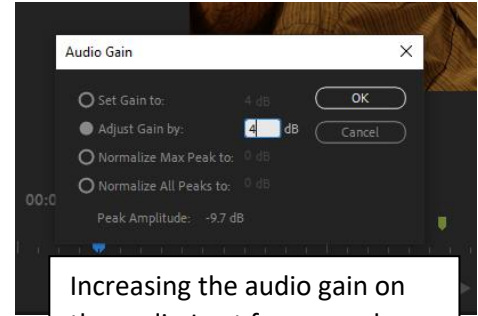

Duplicating the pictures and making the bottom one blurry to look more like a documentary.

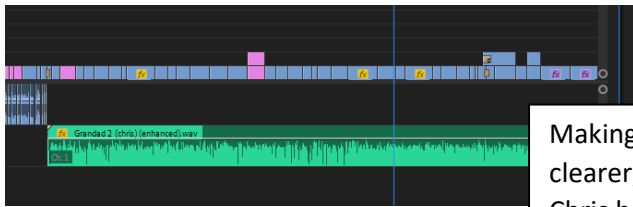

Making the rain more visible.

Adding audio that I recorded from my phone and adding it onto the timeline.

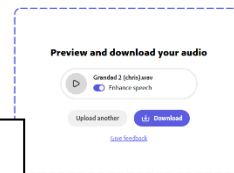

Increasing the audio gain on the audio I got from my phone to 4.

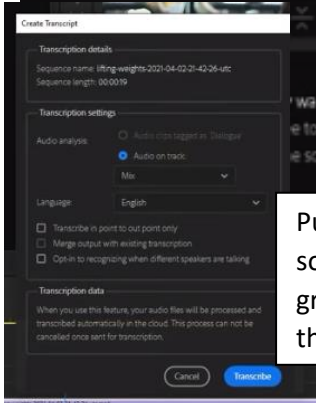

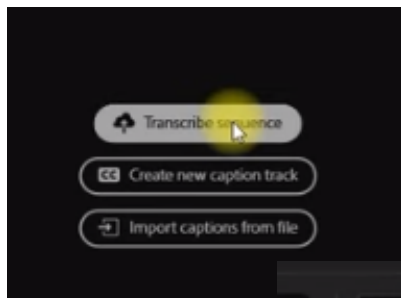

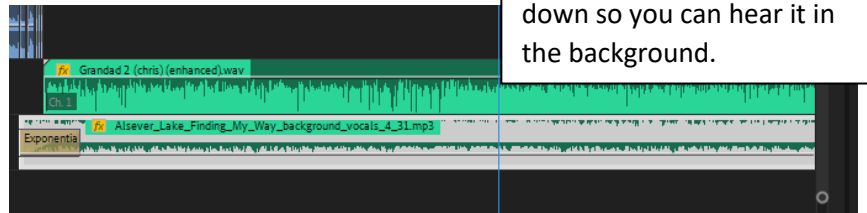

Remove noise from voice recordings with speech enhancement

Speech enhancement makes voice recordings sound as if they were recorded in a professional studio.

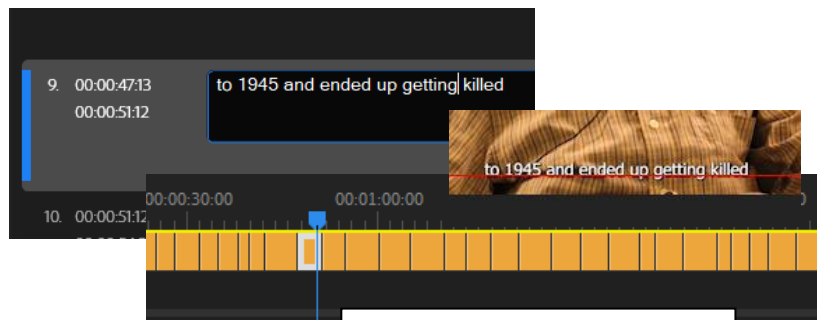

Making the phone audio clearer, with a website that Chris helped me with.

Adding music and turning it down so you can hear it in the background.

Putting auto subtitles onto the audio so people could understand what my grandad is saying when it changes to the phone audio.

Editing the spelling mistakes.
